Ramesh,

This never happens to me but I've misplaced my notes from our call on Wednesday.
I have to update the team on NA Architecture tomorrow morning.

I remember the following but ask that you please remind me of the missing points below. My sincere apologies for this.

<!--[if !supportLists]-->1. <!--[endif]-->The EA team is evaluating WSSR.
<!--[if !supportLists]-->2. <!--[endif]-->The EA team is developing business case for Case Manager as
the replacement for Metastorm as the go-forward platform.
<!--[if !supportLists]-->3. <!--[endif]-->?
<!--[if !supportLists]-->4. <!--[endif]-->?

There were two other topics but I can't recall them.

Regards,
Chase
